Subject: End-of-Life Announcement for UniWest US-454, US-454A, EddyView Prime, EddyView Pro, and EddyView Premium

Dear Valued Customer,

UniWest continually strives to provide the most advanced and reliable nondestructive testing (NDT) instruments available. As technology and component availability evolve, certain legacy products must be retired from active production.

We are writing to inform you that the following UniWest products are now reaching **End-of-Life (EOL)** status and will no longer be manufactured:

- **US-454** **No longer available**
- **US-454A** **No longer available**
- **EddyView Prime** **No longer available**
- **EddyView Pro** **No longer available**
- **EddyView Premium** **No longer available**

Support and Service

Although production has ended, UniWest remains committed to supporting our customers who continue to use these instruments. We will continue to offer:

- **Annual calibration services**
- **Repair services**, depending on parts availability and the nature of the repair

Our technical team will make every effort to maintain service support for as long as possible. However, as critical components become unavailable, some repairs may no longer be feasible.

Recommended Replacement: EddyView II

For customers seeking an upgrade or replacement, UniWest recommends the **EddyView II**. This next-generation instrument builds on the capabilities of our legacy EddyView line, offering:

- Expanded probe compatibility, including up to 32-coil array operation

- Advanced signal processing and display performance
- Compatibility with rotating bolthole scanner technology
- Continued long-term support and service availability
- Full product details at www.uniwest.com/eddyview2

Our sales and engineering teams are available to help you transition from these legacy products to the EddyView II, ensuring continuity in your testing operations with improved performance and reliability.

Contact Information

If you have any questions regarding this End-of-Life notice or wish to discuss upgrade options, please contact us at:
